

ABSTRACT

5 A fuel tank comprises a shell made by assembling together at least two tank portions each made by molding a thermoplastic material and, when assembled together, defining the inside surface of the tank. The tank has a fuel pump fixed to its inside surface before the tank portions are assembled together.

the first time in the history of the world, the *whole* of the human race, in all its parts, has been brought together, and is now in a condition to act as one man.
